

Burnt Wiring

1

What Happened?

- Deterioration due to weather conditions
- Power Surge
- Damaged Shielding due to age

Technician Solutions

- Replace wiring
- Maintenance agreement for proactive repair

Most of the HVAC system's wiring is located on a corner panel by the connection ports. A maintenance agreement would likely prevent a failure due to damaged wiring. Cracked or eroding shielding can be detected early and replaced before you are left without A/C!
